

SEMINAR

EMPOWERING WOMEN ENTREPRENEURS THROUGH INFORMATION AND COMMUNICATION TECHNOLOGIES

Tuesday, 8 October 2013, 14h00-18h00,

Room "Hörsalen", Sida, Valhallavägen 199, Stockholm, Sweden

ICTs offer women entrepreneurs new opportunities to strengthen their businesses. Through mobile phones, computers, radio, TV, the Internet and social media, women entrepreneurs are accessing information and reaching out to customers in ways they could not do before. Effective use of ICTs is helping women entrepreneurs to overcome several barriers.

This seminar will highlight the role ICTs can have in empowering women entrepreneurs. It will also showcase a joint ILO-UNCTAD project, financed by the Government of Sweden, to integrate the ICT dimension into ILO's Framework and Guide for assessing the environment for women entrepreneurship development (WED). It is the first such framework that takes the ICT dimension systematically into account. This new framework is currently being put to use to assess the environment in selected East African countries with the aim to provide policymakers and other stakeholders with practical, evidence-based and publicly validated recommendations on how to make the environment more conducive to WED.

The event will provide an opportunity meet women entrepreneurs from Africa who will share their experience with ICTs as an enabler of their businesses. Participants will also receive an insight into the preliminary findings of WED assessments currently being finalized in Uganda and Tanzania. In addition, the Asian Development Bank will illustrate how it has already been able to make use of the joint ILO-UNCTAD project.

This will be followed by a discussion on how effective policies can enable governments, the private sector, international organizations, civil society, business development service providers and other stakeholders to better leverage the evolving ICT landscape in support of women's entrepreneurship.

A tentative agenda for the seminar is attached.

For more information, please contact Ms. Marie Sicat, Associate Economic Affairs Officer, UNCTAD (marie.sicat@unctad.org); Ms. Virginia Rose Losada, Technical Officer, ILO (roselosada@ilo.org); Mr. Jens Karberg, Programme Manager for ICT for Development, Sida (jens.karberg@sida.se).
